Subject: Fw: CSTAG-Lite Review of Passaic River

Again, in response to a question, the CARP water column data were collected in June & Dec 2000, Mar & Oct 2001 and Mar 2002 (folder "4 water column", Fig 4a-3).

Subject Fw: CSTAG-Lite Review of Passaic River

At last week's call, there was a question about the depth of the high resolution cores shown in Fig 13-4 and 13-7a (in folder "1-2-9 Lower PR data"). Following are the depths:

Core 7A (RM1.4): 16ft
Core 9A (RM2.2): 22ft
Core 26A (RM7.8): 3ft
Core 29A (RM11): 8ft
Core 32A (RM12.6): 5ft

As we discussed last week, we will have another call to discuss the Passaic River data on either Jan 28 or Jan 29, probably from 1-4 PM eastern so that we don't make the west-coasters get up at the crack of dawn.

Please let me know your preference. Also, please let me know any key issues you expect to discuss at the call.

I am working on getting answers to your questions from the last call (sorry, I've been out of the office too much since our call) and on loading the CSM document on the Environmental Science Connector.

This is to confirm that I am sending, via Fed Ex, a CD of the information that you requested on the Lower Passaic River Early Action. Attached is a summary of the files I am sending, organized according to the list that Steve Ells sent on 10/6/08.

[attachment "CSTAG-Lite data needs-summary.doc" deleted by Alice Yeh/R2/USEPA/US]

I'm not sure how you would prefer to proceed, but I would like to suggest the following two conference calls to aid in your review:

- 1) Conference call to review what was sent and answer any initial questions: Week of January 5-9 (one hour)
- 2) Conference call to discuss the data in depth: Week of January 19-23 or Week of January 26-30 (3 hours)

If you agree with this suggestion, please send me your availability for the 3 weeks proposed above. If you would like to proceed some other way, please let me know.
